Bug Tracking & Issue Reporting System

Student Name: Lakshmi Jahnavi Chilukuri

Module: Web Technologies

System: Bug Tracking & Issue Reporting System

Date: 15 /03/2026

1. Introduction

The Bug Tracking & Issue Reporting System is a web application designed to help development teams manage projects and track software issues from reporting to resolution.

The system supports three types of users:

- Administrator
- Tester
- Developer

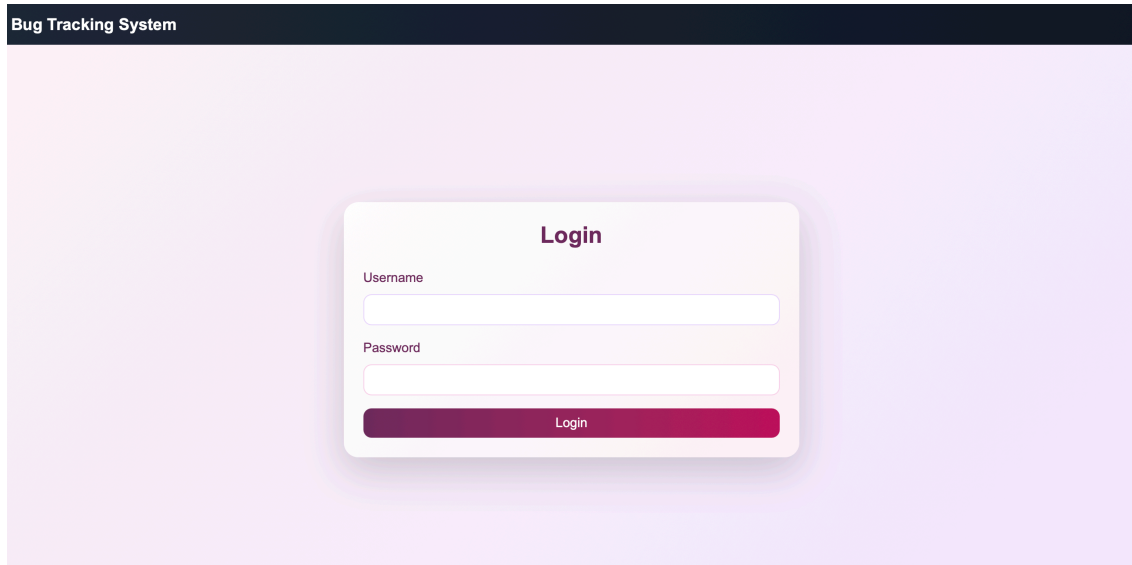

Each role has different permissions to ensure a structured workflow.

2. System Login

Users must log in to access the system.

Steps

1. Open the application in a web browser.
2. Enter username and password.
3. Click **Login**.

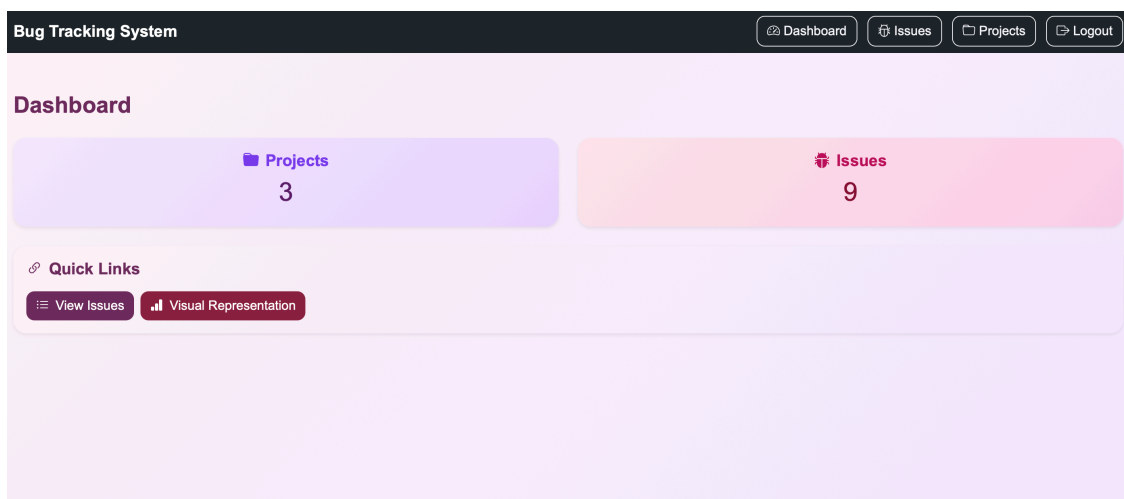

3. Administrator Guide

3.1 Logging in as Administrator

Use the following credentials:

Username: **admin**

Password: **admin123**

3.2 View Graphical Representation

Steps

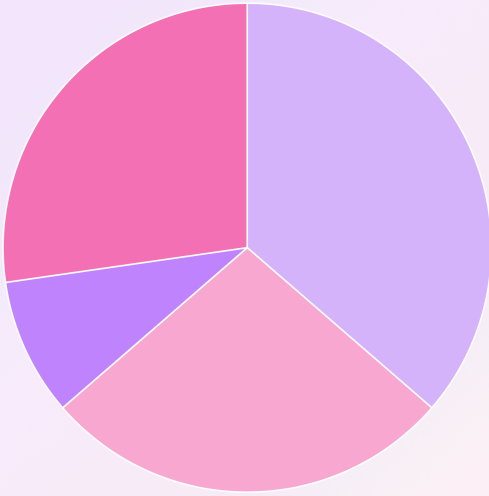

1. To check the graphical view of Issues by status and priority
2. Click **Visual Representation**.

Visual Representation

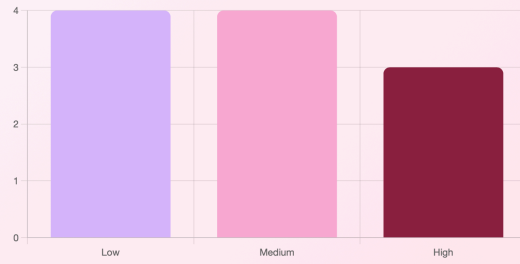

Overview of issues by status and priority.

 Issues by Priority

3.3 Create a Project

Steps:

3. Navigate to **Projects**.
4. Click **Create Project**.
5. Enter project details.
6. Click **Save Project**.

3.4 Archive a Project

Steps:

1. Select a project.
2. Click **Archive**.
